EXPERIENCE

IT Consultant / Web Developer

Freelance

Jan. 2023 – Present

Online

- Streamlined small business workflow by connecting third-party services with Google APIs- automating lead generation and handling, contact databases, client communication, and event logistics
- Increased visibility and facilitated growth for small businesses by consulting, designing and implementing clean, responsive websites for clients using UI/UX, SEO, and accessibility best practices

Lead Organizer

Casa La Banda

Jan 2020 – Oct 2021

Mexico City, MX

- Co-led a project to provide housing and assistance to LGBTQ+ migrants and refugees during challenging pandemic circumstances
- Communicated cross-culturally with donors, volunteers, and clients to advance our collective goals

Disability Student Aide

University of Montana

Sep. 2017 – Aug. 2019

Missoula, MT

- Demonstrated flexibility and empathy while helping disabled students achieve their educational goals
- Assisted organization with modernizing their record-keeping system using Microsoft Office tools

Server

Catalyst Cafe

Sep. 2013 – Aug. 2017

Missoula, MT

- Provided reliable and efficient customer-centered service in an extremely busy and high volume restaurant, cultivated my own clientele
- Collaborated closely with managers and co-workers, employing effective and friendly communication strategies to cultivate a cohesive and productive work environment

PROJECTS

Bones – Content Management System | *React, Node.js, Express, MongoDB*

Aug. 2023 – Present

- Created a customizable CMS with React frontend and Express API backend
- Solved a problem for my clients who needed an affordable blogging solution that is easily customizable and able to plug into existing or custom websites
- Implemented features such as authentication/authorization, rich-text posts, and full CRUD

Flashy – Flashcard App | *Node.js, Express, MongoDB*

Jan. 2023 – May 2023

- Developed a flashcard app with a strong UI/UX enabling students to create cards and sets for memorization
- Implemented robust backend using Express.js with full CRUD functionality, as well as a frontend utilizing EJS templating
- Ensured web security against database injection and XSS using sanitization and JOI
